

BarkMonad Whitepaper

[Back to Website](#)

Overview

BarkMonad (\$BARK) is a troll dog meme token on the Monad network with a playful notebook aesthetic. It's built for community, humor, and light experimentation. No promises, no complicated mechanics — just bark, memes, and a shared story.

Vision

To turn market ups and downs into creative fuel. Holders contribute to the “pages” of BarkMonad through memes, community events, and small experiments. If an idea is silly enough to laugh at, it's probably fun enough to try.

Tokenomics

- Total Supply: 1,000,000,000 \$BARK
- Tax (Buy/Sell): 0% / 0%
- Liquidity: 100% LP burned 🔥

LP burned means there's no unlock button. Price movement depends on supply–demand and meme quality.

Roadmap (Scribbles)

- Page 1 — Launch & First Bark: deploy on Monad, burn 100% LP, publish the notebook-style website, open community channels, start “Bark Notes”.
- Page 2 — Notebook Takeover: “Share Your Page” campaign with holder notebook pages; curate the best for community collectibles.
- Page 3 — BarkVerse & Mini Tools: light tools like BarkPad, quest board, and a shitposting leaderboard; evolve with community ideas.

Disclaimers

- This is a meme token. Do not invest money you cannot afford to lose.

- No guarantees or promises. The project evolves with community participation.
- Always verify official links in community channels.
